

SAFEGUARDING INVESTED CAPITAL. 31

The supervision of investments during the second and all subsequent years after a list has been reconstructed is a task comparatively light; therefore the annual fee charged on this account is small when it is compared with the sum charged for the reconstruction and supervision during the first year.

The Registry's staff is pledged to secrecy regarding its customers' transactions. The record of each client is referred to in the office by a number only, and all clients' communications are treated in a strictly private and confidential manner.
