## The Contents of the Review

Written for the private investor and not for the speculator, this journal provides a complete compendium of investment facts. In addition to its special articles, it contains each month a tabular record which embraces the life history of over 5,000 recognised securities, including a Digest of the Balance Sheet of each as it appears.

Every new Prospectus is criticised and analysed in an entirely impartial way, and the chief financial events of interest are dealt with under "International Financial Information."

**DAILY TELEGRAPH.**—"For investors and all who would keep their eyes on the money markets of the world this Review is invaluable."

Yearly subscriptions are received at the reduced rate of 10/- for the 12 monthly parts, post free. A copy of the current issue will be sent on approval to any inquirer who is a likely subscriber.
