

## The Jasenica Co. Ltd.

The Jasenica Co. Ltd. was founded in 1923 with a capital of 10,000,000 Dinars for the construction and repair of every kind of material for railways, carriages, trucks and locomotives, for the manufacture of agri-

In the kingdom where industry is very little developed as yet the company had to install all the auxiliary plants necessary for the realization of the object in view. These installations comprise an important forge, a foundry for

cultural machinery, the establishment of mills, cartwrighting generally and other constructions in iron and wood.

At Smederevo (Old Serbia) the company possesses great workshops, covering more than 6,000 square meters of a total area of 60,000 and capable of effecting monthly the repair of 3 locomotives and 100 trucks of normal gauge.

iron and copper as well as a workshop for incidental repairs.

A steam plant furnishes the electric current and the compressed air necessary in the works.

For the clerks and the workmen a colony of nice dwelling houses has been erected.

At present the works employ about 300 workmen.
