

INDEX

See also Supplementary Index on page 825.

The numbers refer to pages, not paragraphs; those in black type are to passages that contain more than an incidental mention of the subject of the reference.

Names not found in the index should be looked for in the list of Alternative Geographical Names immediately preceding. Conventional abbreviations are occasionally used to save space, as, *eg.*, Arch. = Archipelago; Mts. = Mountains; Penin. = Peninsula; pop. = population; prov. = province; R. = River; Ry. = Railway; rnfal. = rainfall; temp. = temperature, etc.
