

Change of the percentage of the share of various countries in the World's Production of the Electrical Industry 1913 and 1925, reduced to a common price basis and on the basis of pre-war values.

The measuring scale of the draught has been drawn in such a way that the represented superficial contents of each country correspond to the production of quantity; it is therefore possible to derive from the area a comparison of the percentage of the share as well as of the actual production.
