

V. Cumulation, etc.—Continued.	
Data for each of the five areas investigated in Michigan—	
22. Alma, exclusive of capital charges	45
23. Alma, inclusive of capital charges	45
24. Bay City, exclusive of capital charges	47
25. Bay City, inclusive of capital charges	47
26. Caro, exclusive of capital charges	49
27. Caro, inclusive of capital charges	49
28. Owosso, exclusive of capital charges	51
29. Owosso, inclusive of capital charges	51
30. Sebawaing, exclusive of capital charges	53
31. Sebawaing, inclusive of capital charges	53
VI. Labor costs, Michigan, by areas:	
32. Labor cost rates per hour	55
33. Hours of direct labor per acre	55
34. Hours of direct and indirect labor per acre	56
35. Hours of labor per acre to perform once the various machine operations	56
36. Percentage of hand labor done by (1) contract labor, (2) family help, (3) hired help and grower's labor	57
VII. Horse costs, Michigan, by areas:	
37. Horse cost rates per hour	58
38. Horse time per acre	58
39. Horse time per acre to perform once the various machine operations	58
VIII. Capital and capital charges, Michigan, by areas:	
40. Market value of sugar-beet land	59
41. Average value of other capital	59
42. Value of land and other capital used	60
43. Comparison of land charges as determined by three different methods	60
Comparison of total capital charges as determined by three methods—	
44. Per acre	61
45. Per ton	61
46. Comparison of cash rental paid for land with estimated cash rentals	62
47. Interest rates paid on farm mortgages	62
48. Returns for capital, management, and labor	63
X. Farm practice in sugar-beet production:	
Kinds of operations and percentage of total number of farms on which each was performed a given number of times—	
49. On tractor and nontractor farms	64
50. On nontractor farms only	66
51. Kinds and amounts of tractor work performed in sugar-beet production	68
52. Manuring practice in sugar-beet production	69
53. Use of commercial fertilizers on sugar-beet land	69
54. Hauling beets from fields to unloading stations	70
55. Pounds of beet seed planted per acre	72
XI. Types of farming on farms investigated, Michigan, by areas:	
56. Use made of farm area operated	73
57. Size of farms and relative importance of sugar-beet acreage	73
58. Sugar-beet yields per acre, by areas	73
59. Acreage of the principal crops grown	74
60. Percentages of cultivated land devoted to various crops	74
61. Yields per acre of the principal crops grown	75
62. Number of head per farm of various kinds of livestock	75
63. Tenure of farms	75
64. Tenure of sugar-beet land	76
65. Abandoned beet acreage	76
66. Pounds of sugar extracted per ton of sugar beets	76
