<sup>1</sup> Import statistics not segregated to apply rates under the tariff act of 1930, but an estimate has been made on which the rates have been applied, as follows: 144,958,601 pounds, valued at \$11,596,688, for cattle weighing less than 700 pounds each, and 105,438,750 pounds, valued at \$8,461,329, for cattle weighing 700 pounds or more each.

<sup>2</sup> Import data not available to apply rate of duty under tariff act of 1930, but it is estimated that practically all the imports were of light blood albumen, and therefore the rate for light blood albumen has been used.

<sup>3</sup> Import statistics not segregated to determine fish roe boiled and packed in containers so as to apply the rate of 30 per cent. It is, therefore, estimated that all the imports would take the 20 cents per pound rate.

<sup>4</sup> The rates on dates, under tariff act of 1930, are as follows: Fresh or dried with pits, 1 cent per pound; with pits removed, 2 cents per pound; any of the foregoing in packages weighing with immediate containers not more than 10 pounds each, is 7½ cents per pound. Import statistics not segregated to apply the 7½-cent rate on fresh or dried dates. The rate under tariff act of 1930 on prepared or preserved dates is 35 per cent. Under Treasury Department decision, dates pitted were dutiable under the prepared or preserved rate. In applying the rate of duty for prepared and preserved dates under act of 1930, it has been estimated that 50 per cent of the imports were pitted (fresh or dried) to which the rate of 2 cents per pound has been applied and the rate of 35 per cent applied to the balance of these imports. The rate of 7½ cents per pound on packages of dates pitted weighing with containers not more than 10 pounds each can not be applied, as statistics are not segregated.

<sup>5</sup> Rates under tariff act of 1930 are as follows: Green, ripe, or in brine, one-half cent per pound; dried, desiccated or evaporated, 2 cents per pound. Import statistics not segregated. The rate of 2 cents per pound is applied, as it is estimated all imports are dried.

<sup>6</sup> Import statistics not segregated to apply rates under 1930 tariff act. It is estimated that 300,000 pounds were imported which would take the rate of 25 cents per pound; balance of importation would be duty free.

<sup>7</sup> Import statistics not segregated. It is estimated all imports are shelled nuts.

<sup>8</sup> Import statistics not segregated. It is estimated that 40 per cent of imports are shelled and 60 per cent unshelled.

<sup>9</sup> It is estimated that 85 per cent of the imports were shelled, consisting of cashew nuts, and that 15 per cent of the imports were other than cashew nuts, and were unshelled.

<sup>10</sup> Sweet clover dutiable under 1930 act at 4 cents per pound. Import data not segregated so as to apply rate.

<sup>11</sup> Tariff act of 1930 provides: Beans not specially provided for, and black-eye cowpeas, green or unripe, 3½ cents per pound; dried, 3 cents per pound; cowpeas not specially provided for are free. The imports shown are dried cowpeas, but the bulk of them are black-eye cowpeas.

<sup>12</sup> In absence of statistical data, it is estimated one-half of import quantity would be dutiable at 10 cents per pound drained weight, plus 45 per cent ad valorem on total import value.

<sup>13</sup> Import data not segregated to apply rates under tariff act of 1930. Segregation, as to quantity and value, has been made on estimates based on 9 months analysis of 1928 imports invoices at New York, together with data published by the Federal Horticultural Board for the fiscal year ending June 30, 1928.

<sup>14</sup> Import statistics not segregated, but it is estimated all imports were crude chicory. Chicory crude is dutiable, under 1930 act at 2 cents per pound and dandelion roots are dutiable at 1½ cents per pound.

<sup>15</sup> It is estimated that 1,000,000 pounds of sweet chocolate were imported which would be dutiable at 4 cents per pound and the balance at 40 per cent ad valorem.

<sup>16</sup> Import statistics not segregated. Quantity shown as imports has been calculated from data of imports of the country of origin.
