

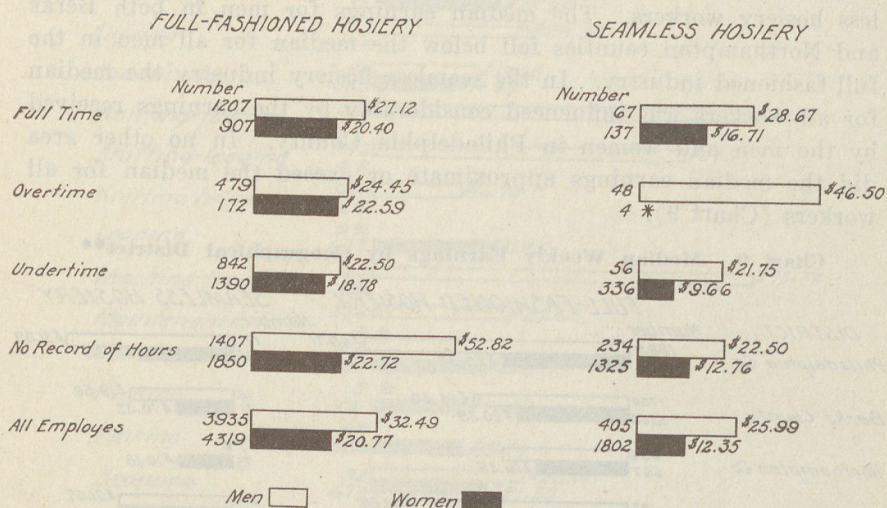

Chart 10. Median Weekly Earnings by Variation from Scheduled Hours\*\*

### Median weekly earnings of full-time workers by length of scheduled hours

In an effort to ascertain whether the length of the scheduled work week influenced the earnings of hosiery workers, the median weekly earnings of full-time workers were arrayed according to length of scheduled hours. There appeared to be a tendency for women's earnings to be slightly higher when the scheduled work week was short. Men with scheduled hours of 52 and less than 54 had the highest median earnings but earnings were higher for the group scheduled to work a 48 hour week than for those with a weekly schedule in excess of 54 hours (Table 15).

Table 15. Median Weekly Earnings of Full-time Workers by Length of Scheduled Hours\*\*\*

Scheduled hours	Full-fashioned hosiery				Seamless hosiery			
	Men		Women		Men		Women	
	Number	Median earnings	Number	Median earnings	Number	Median earnings	Number	Median earnings
Under 48								
48	109	\$27.99	265	\$20.89	49	\$32.99	56	\$19.07
Over 48 and under 50								
50	10	*	2	*	6	*	70	14.92
Over 50 and under 52								
52	259	\$55.99	5	*				
52 and under 54	10	*	623	\$20.23				
54			12	*	10	*	11	*
Over 54 and under 60								
60	809	24.78						
60 and over	10	*			2	*		
Total	1207	27.12	907	20.40	67	28.67	137	16.71

\*Median not computed where number is less than 15.
