

Median weekly earnings by individual plant

In the full-fashioned hosiery plants the median earnings for men exceeded \$30 in all but three plants. In five plants the median earnings for men exceeded \$50. There was no full-fashioned hosiery plant where the median earnings of women were as much as \$30. One plant had a median for women of less than \$12. In the seamless hosiery plants men's median earnings ranged from \$18 to \$31, and women's median earnings from less than \$10 to \$18. In the plants where both full-fashioned and seamless hosiery operations were carried on the median earnings tended to more nearly approximate the medians in plants where only full-fashioned hosiery was manufactured (Table 16). There

Table 16. Median Weekly Earnings of Men and Women in Each Plant

Plant	Men		Women	
	Number	Median earnings	Number	Median earnings
Full-fashioned hosiery				
Plant No. 1	1667	\$28.72	1458	\$20.44
2	20	25.50	24	11.42
3	378	32.08	494	21.49
